1. निम्नलिखित गद्यांश पढ़कर प्रश्नों के उत्तर दीजिए —

> खेल केवल मनोरंजन का साधन नहीं हैं; वे जीवन की पाठशाला भी हैं। मैदान पर बच्चा हारना और फिर से उठकर खड़ा होना सीखता है। टीम के साथ खेलते हुए वह समझता है कि अकेले की जीत से बड़ी सबकी जीत होती है।
> आजकल बहुत-से बच्चे खेल के मैदान की जगह मोबाइल की स्क्रीन पर समय बिताते हैं। इससे आँखों पर ज़ोर पड़ता है, नींद कम होती है और शरीर सुस्त हो जाता है। डॉक्टरों के अनुसार किशोरों को प्रतिदिन कम-से-कम एक घंटा शारीरिक गतिविधि करनी चाहिए। तैराकी, दौड़, साइकिल चलाना या कोई भी खेल — शरीर के साथ-साथ मन को भी स्वस्थ रखता है। जो विद्यार्थी पढ़ाई और खेल में संतुलन रखते हैं, वे परीक्षा के तनाव को भी बेहतर ढंग से सँभाल पाते हैं।

Slot: 4:00–6:00

Sections: A Reading (20), B Grammar and Writing (20), C Literature (40). All questions compulsory; internal choices given.
Write within the word limit. Book closed.
2-hour section practice: Section A se shuru; bacha hissa agle din untimed. Ye full 3-hour simulation nahi hai.

Section A · Reading · 20 marks

1. Read the passage and answer the questions.

> 1. Every year, millions of Indians donate blood, yet hospitals often report shortages. One unit of donated blood can help up to three patients, because it can be separated into red cells, plasma and platelets.
> 2. A healthy person between 18 and 65 years of age who weighs at least 45 kg can usually donate blood. The process takes about ten minutes, and the body replaces the lost fluid within a day. Red cells are replaced in a few weeks.
> 3. Blood cannot be manufactured in a factory. It must come from donors. Platelets last only about five days in storage, which is why regular donation is needed rather than large drives once a year.
> 4. Many myths stop people from donating — that it causes weakness, or that it is painful. In reality, donors feel only a small pinch, and they are given juice and a short rest afterwards.
> 5. Schools and colleges can help by spreading awareness. Students under 18 cannot donate, but they can encourage family members and help organise camps.

(i) How many patients can one unit of blood help? [1]
(ii) Into which three parts can donated blood be separated? [1]
(iii) What is the age range for donating blood? [1]

(x) Find a word in paragraph 3 that means “made in large quantities by machines”. [1]
[10]

2. Read the passage and answer the questions.

> 1. Arjun had always been the fastest runner in his school. So when he lost the district 400 m race to a boy from a village school, he was shocked. That evening he refused to eat and threw his spikes into a corner.
> 2. His coach, an old athlete with a limp, came to see him the next morning. "Do you know why you lost?" he asked. Arjun shrugged. "You ran the first 200 metres for the crowd," the coach said. "The other boy ran the whole race for the finish line."
> 3. For the next three months, Arjun trained differently. He practised pacing himself, recorded his lap times in a notebook and went to bed early. He also began running with the village boy, Raju, on Sundays. Raju had no proper shoes, so Arjun gave him his old pair.
> 4. At the state meet, Arjun came second and Raju came first. On the podium, Arjun was surprised to find that he was smiling. He had lost the gold, but he had found a friend and learnt to run his own race.

(i) Why was Arjun shocked? [1]
(ii) How did he react that evening? [1]
(iii) According to the coach, why did Arjun lose? [2]
(iv) Write two changes Arjun made in his training. [2]
