English · Full Paper 1 (Annual pattern) · 14 Feb

Class 9 · Reading · Grammar · Writing · Literature (Kaveri Units 1–8)

Test ID: T2027-02-14 · Sunday, 14 February 2027

Naam: _____ Samay: 180 min Marks: ___ / 80

Slot: 9:00–12:00

The paper has three sections: A Reading (20), B Grammar and Writing (20), C Literature (40). All questions are compulsory; internal choices are given.
Write answers within the word limit. Book closed for all sections.

Section A · Reading · 20 marks

1. Read the passage and answer the questions.

> 1. Millets such as jowar, bajra and ragi were once the main grains eaten across India. Over the last fifty years, rice and wheat took their place on most plates. Now millets are making a comeback, and for good reasons.
> 2. Millets grow well in dry areas and need far less water than rice. A crop of rice may need about three to four times more water than a crop of bajra. Millets can also survive high temperatures and poor soil, which makes them important at a time when rainfall is becoming uncertain.
> 3. Nutritionists point out that millets are rich in fibre, iron and calcium. Ragi, for example, has much more calcium than rice or wheat. Because millets are digested slowly, they keep us full for longer and help control blood sugar.
> 4. In 2023, the world celebrated the International Year of Millets, an idea proposed by India. Since then, many schools have added millet dishes like ragi laddoos and bajra khichdi to their menus. Farmers say demand has risen, though prices for growers still need to improve.
> 5. Cooking habits change slowly. Many young people find millets unfamiliar. Chefs and home cooks are now inventing millet pizzas, cookies and noodles, hoping that taste, not just health, will bring millets back to every kitchen.

(i) Name the three millets mentioned in paragraph 1. [1]
(ii) Why are millets suitable for dry areas? [1]
(iii) How much more water may rice need than bajra? [1]
(iv) Which millet is mentioned as being rich in calcium? [1]
(v) Why do millets keep us full for longer? [1]
(vi) Which country proposed the International Year of Millets? [1]
(vii) State whether True or False: Millet farmers are fully satisfied with prices. [1]
(viii) Find a word in paragraph 5 that means “not well known”. [1]
(ix) How are chefs trying to make millets popular again? [1]
(x) Suggest a suitable title for the passage. [1]
[10]

2. Read the passage and answer the questions.

> 1. Every morning at 6 a.m., seventy-year-old Kamla Devi opens the gate of her small garden in Indore and waits. Within minutes, children from the lane arrive with buckets. Together they water the plants, pull out weeds and check the bird-feeders hanging from the guava tree.
> 2. The garden started five years ago when Kamla Devi, a retired schoolteacher, felt lonely after her children moved to other cities. "I had time, a little land and a lot of stories," she laughs. She began by asking one neighbour's son to help her plant tulsi. Soon, his friends wanted to join.
> 3. Today the garden has more than forty kinds of plants. The children have learnt to make compost from kitchen waste, and they keep a notebook recording which birds visit each week. Last summer they counted twenty-three species, including a pair of purple sunbirds.
> 4. Parents say their children now spend less time on phones. "My son used to wake up at nine," says one mother. "Now he is the first one out of the door." For Kamla Devi, the garden has given her something more precious than flowers — a family of young friends who call her Nani.

(i) Who is Kamla Devi? [1]
(ii) Why did she start the garden? [2]
(iii) Name two things the children have learnt in the garden. [2]
(iv) How many bird species did the children count last summer? [1]
(v) What change have parents noticed in their children? [1]
(vi) What does Kamla Devi value more than flowers? [1]
(vii) Pick the word from paragraph 4 that means "very valuable". [1]

(viii) Which quality of Kamla Devi does the passage mainly show? (a) strictness (b) generosity and warmth (c) fear (d) pride [1]
[10]
