PARENT ONLY — SOLVED ANSWER KEY

Vyom · Parent answer key

2 Nov – 8 Nov 2026 · Monday–Sunday · NDPS Class 9

Vyom ko test se pehle ye PDF mat dena. Student pack mein sirf questions aur blank answer space hai. Is alag parent PDF mein har original question ke saath uska matching solved answer, working aur marking points diye hain; Test ID se student paper match karein.

Checking: same evening. C = concept, R = recall, K = careless, T = time.

90%+: short revision. 75–89%: weak-topic practice + retest. Below 75%: topic dobara samjhao; mistakes notebook mein likho.

Answer keys existing source question banks se li gayi hain; school pattern abhi unconfirmed hai. Alternate valid answers ko marking guidance ke mutabik accept karein.

Test ID: T2026-11-02

Class 9 · Part 1: Ch 1 Understanding Social Science · Ch 2 Shaping of the Earth's Surface · Ch 3 Atmosphere and Climate · Ch 4 Early Humans

---

Q1 **[1]**

Question: The four disciplines introduced in the Grade 9 Social Science textbook are:

(a) History, Geography, Political Science, Economics

(b) History, Civics, Sociology, Psychology

(c) Geography, Geology, Economics, Commerce

(d) History, Political Science, Law, Ethics

Expected answer / marking points: (a)

Q2 **[1]**

Question: The outermost layer of the Earth on which we live is the:

(a) Mantle (b) Core

(c) Crust (d) Asthenosphere

Expected answer / marking points: (c) Crust

Q3 **[1]**

Question: Breaking down of rocks **without** moving the broken material is called:

(a) Erosion (b) Weathering

(c) Deposition (d) Folding

Expected answer / marking points: (b) Weathering

Q4 **[1]**

Question: Icicle-shaped formations hanging from the ceiling of limestone caves are:

(a) Stalagmites (b) Stalactites

(c) Sinkholes (d) Moraines

Expected answer / marking points: (b) Stalactites

Q5 **[1]**

Question: The gas that forms about 78% of the atmosphere is:

(a) Oxygen (b) Carbon dioxide

(c) Nitrogen (d) Argon

Expected answer / marking points: (c) Nitrogen

Q6 **[1]**

Question: The layer of the atmosphere that contains the ozone layer and is ideal for flying aeroplanes is the:

(a) Troposphere (b) Stratosphere

(c) Mesosphere (d) Thermosphere

Expected answer / marking points: (b) Stratosphere

Q7 **Question:** Microlithic tools are mainly associated with the:
[1]

(a) Palaeolithic period
(b) Mesolithic period
(c) Bronze Age
(d) Iron Age

Expected answer / marking points: (b) Mesolithic period

Q8 **Question:** Cuneiform was the script of the:
[1]

(a) Harappans
(b) Egyptians
(c) Sumerians of Mesopotamia
(d) Chinese

Expected answer / marking points: (c) Sumerians of Mesopotamia

Q9 **Question:** Distinguish between weathering and erosion.
[2]

Expected answer / marking points: Weathering: rocks break down in place; no movement of material [1]. Erosion: broken material is worn away and carried away by water, wind, ice or waves [1].

Q10 **Question:** Why do most meteorites burn up before reaching the Earth? Name the layer where this happens.
[2]

Expected answer / marking points: Meteorites burn due to friction with the gases of the atmosphere as they enter at high speed [1]; this happens in the mesosphere [1].

Q11 **Question:** Name the four main seasons of India as recognised by the IMD.
[2]

Expected answer / marking points: Winter, Summer, Monsoon, Post-monsoon (retreating monsoon) [½ each].

Q12 **Question:** Give two reasons why historians divide early human history into ages such as the Stone Age and the Bronze Age.
[2]

Expected answer / marking points: Ages are based on the main material used for tools (stone, copper, bronze, iron) [1]; it shows stages of technological progress and changes in way of life, e.g., from hunting-gathering to farming and cities [1].

Q13 **Question:** What is a meander? How is an oxbow lake formed from it? Why are areas near meanders useful for people?
[3]

Expected answer / marking points: A meander is a winding curve or bend of a river in its middle/lower course [1]. Erosion on the outer bank and deposition on the inner bank make the loop narrower; the river cuts across the neck and the cut-off loop becomes an oxbow lake [1]. Fertile soil good for farming; settlements, navigation and irrigation (any one) [1].

Q14 **Question:** Distinguish between the south-west monsoon and the north-east monsoon (any three points).
[3]

Expected answer / marking points: SW monsoon: summer, June–September; blows from sea to land; moist, brings most of India's rainfall. NE monsoon: winter, October–February; blows from land to sea; mostly dry, but brings rain to Tamil Nadu/east coast after crossing the Bay of Bengal (3 matched points) [3].

Q15 [3] **Question:** Compare the Palaeolithic, Mesolithic and Neolithic periods on the basis of tools and way of living.

Expected answer / marking points: Palaeolithic: large stone tools like handaxes, cleavers; hunter-gatherers living in caves/open camps [1]. Mesolithic: small microlithic tools; temporary settlements near rivers/lakes, fishing [1]. Neolithic: polished tools; farming, domestication, permanent villages, pottery and weaving [1].

Q16 [3] **Question:** How does studying Social Science help us as citizens of a democracy? Give three points.

Expected answer / marking points: Helps us understand how government and laws work, so we participate responsibly; teaches rights and responsibilities; helps us ask informed questions about public issues like environment, health, jobs; builds respect for diversity and national unity (any three) [3].

Q17 [4] **Question:**

> During summer, the landmass of India heats up faster than the surrounding oceans. This creates a low-pressure area over the subcontinent, while the Indian Ocean remains cooler with high pressure. Moist winds blow from the ocean towards the land, bringing rainfall between June and September. Most of India's agriculture depends on this rainfall.

(i) Name the monsoon described above. [1]
(ii) Why do winds blow from the ocean towards the land in summer? [1]
(iii) Give two ways in which a weak monsoon would affect farmers. [2]

Expected answer / marking points: (i) South-west (summer) monsoon [1]. (ii) Land heats faster → low pressure over land, high pressure over the ocean; winds move from high to low pressure [1]. (iii) Crops fail or yield less; less water for irrigation; loss of income/debt (any two) [2].

Q18 [5] **Question:** "Plate movements are responsible for the distribution of earthquakes and volcanoes." Explain. What precautions would you take if you lived in an earthquake-prone region?

ATHVA / OR

"Bronze Age civilisations developed independently but shared common features." Explain with reference to the Sindhu–Sarasvatī, Mesopotamian and Egyptian civilisations.

Expected answer / marking points: The lithosphere is broken into plates that move slowly over the mantle due to convection currents [1]. Where plates collide, separate or slide past each other, stress builds up and is released as earthquakes; magma rises at plate boundaries forming volcanoes [2]. So earthquakes and volcanoes are concentrated along plate boundaries (e.g., Pacific Ring of Fire, Himalayas) [1]. Precautions: earthquake-resistant buildings, drop-cover-hold drill, emergency kit, keep heavy objects low (any two) [1].
OR: Developed separately in fertile river valleys — Sindhu/Sarasvatī, Tigris–Euphrates, Nile [1]. Common features: cities/urban centres, trade, writing (Harappan script, cuneiform, hieroglyphs), administration, social organisation, use of bronze, agriculture surplus (any three explained) [3]. Example of a unique feature of one civilisation [1].

Q19 [3] **Question:** On the outline political map of India, locate and label: (a) Mehrgarh (early farming site, now in Pakistan — mark near the Bolan Pass) (b) Bhimbetka rock shelters, Madhya Pradesh (c) Dholavira, Gujarat.

Expected answer / marking points: Correct location of each place with label [1 × 3]. Mehrgarh: Balochistan near Bolan Pass (west of the Indus); Bhimbetka: near Bhopal, central MP; Dholavira: Kutch, Gujarat.

Q1 [1]
Question: What is the SI unit of acceleration?

Expected answer / marking points: m s^{-2}.

Q2 [1]
Question: A body moves in a circle of radius r and returns to the start. What is its displacement?

Expected answer / marking points: Zero.

Q3 [1]
Question: What does the slope of a velocity–time graph give?

Expected answer / marking points: Acceleration.

Q4 [1]
Question: Who formalised zero as a number and gave rules for arithmetic with negative numbers?

Expected answer / marking points: Brahmagupta (628–629 CE).

Q5 [1]
Question: Is the sum of a rational number and an irrational number rational or irrational? Give an example.

Expected answer / marking points: Irrational, e.g., $2 + \sqrt{3}$.

Q6 [1]
Question: What is data literacy?

Expected answer / marking points: The ability to read, understand, analyse and communicate with data.

Q7 [1]
Question: Name one tool used to visualise data.

Expected answer / marking points: Bar graph / pie chart / line graph (or a tool like a spreadsheet).

Q8 [2]
Question: Using Euclid's algorithm, find gcd(375, 825).

Expected answer / marking points: $825 = 2 \times 375 + 75$; $375 = 5 \times 75 + 0 \Rightarrow$ gcd = 75 [steps 1 + answer 1].

Q9 [1]
Question: Write the divisors of 18 found by checking every j from 1 to 18.

Expected answer / marking points: 1, 2, 3, 6, 9, 18.

Score: ___ / 10 Checked by: _____

Q1 [1]

Question: What is meant by popular sovereignty?

Expected answer / marking points: Supreme power rests with the people.

Q2 [1]

Question: What is universal adult franchise?

Expected answer / marking points: Every adult citizen (18+) has the right to vote, without discrimination.

Q3 [1]

Question: Why is India called the world's largest democracy?

Expected answer / marking points: It has the largest number of registered voters / citizen participation in the world.

Q4 [2]

Question: Choose the correct verb: (i) Neither the teacher nor the students _____ (was / were) late. (ii) Each of the boys _____ (has / have) a bicycle.

Expected answer / marking points: (i) were [1] (ii) has [1]

Q5 [1]

Question: Fill in with the correct determiner: I have __ money left, so I can't buy the book. (a little / little)

Expected answer / marking points: little.

Q6 [1]

Question: When is the work done by a force zero?

Expected answer / marking points: When displacement is zero or perpendicular to the force.

Q7 [1]

Question: What is the SI unit of power?

Expected answer / marking points: Watt (W) = 1 J s^{-1}.

Q8 [2]

Question: Use repeated subtraction / division (Euclid's method) to find gcd(84, 36).

Expected answer / marking points: 84 = 2 × 36 + 12 [0.5]; 36 = 3 × 12 + 0 [0.5]; gcd = 12 [1].

Q1 [1]

Question: "क्या लिखूँ" निबंध के लेखक कौन हैं?

Expected answer / marking points: पदुमलाल पुन्नालाल बख्शी।

Q2 [1]

Question: "निबंध" शब्द का शाब्दिक अर्थ क्या है?

Expected answer / marking points: नि + बंध — भली-भाँति बँधा या गठा हुआ।

Q3 [1]

Question: Expand $(2x + 3)^2$.

Expected answer / marking points: $4x^2 + 12x + 9$

Q4 [1]

Question: Using an identity, find 103^2.

Expected answer / marking points: $(100 + 3)^2 = 10000 + 600 + 9 = 10609$

Q5 [1]

Question: What were the sabhā and samiti?

Expected answer / marking points: Vedic assemblies that advised and limited the rājā.

Q6 [1]

Question: What were gaṇas or saṁghas?

Expected answer / marking points: Early republics where power was shared by a group/assembly, not one king.

Q7 [2]

Question: Write the steps of an algorithm to find the largest of three numbers a, b, c.

Expected answer / marking points: Set max = a [0.5]; if b > max, max = b [0.5]; if c > max, max = c [0.5]; output max [0.5].

Q8 [2]

Question: An algorithm to test whether n is prime checks divisors from 2 up to √n. How many checks are needed for n = 97? Is 97 prime?

Expected answer / marking points: Check 2 to 9 (since $9^2 = 81 < 97 < 100$): 8 checks [1]; none divides 97, so it is prime [1].

Q1 [1]

Question: What does the area under a velocity–time graph give?

Expected answer / marking points: Displacement (distance for motion in one direction).

Q2 [2]

Question: A car covers 120 km in 2 h and the next 60 km in 1 h. Find its average speed.

Expected answer / marking points: Total distance 180 km, total time 3 h [1]; 60 km/h [1].

Q3 [3]

Question: "सीमा ने मीठे आम खाए।" — रेखांकित शब्दों का व्याकरणिक भेद लिखिए।

Expected answer / marking points: सीमा — व्यक्तिवाचक संज्ञा; मीठे — गुणवाचक विशेषण; खाए — क्रिया (भूतकाल) [1 × 3]

Q4 [1]

Question: ‘अनुशासन’ में उपसर्ग और मूल शब्द अलग कीजिए।

Expected answer / marking points: अनु + शासन।

Q5 [1]

Question: In which event did Deepa Malik win silver at the 2016 Rio Paralympics?

Expected answer / marking points: Shot put.

Q6 [1]

Question: What is Deepa Malik’s motto about disability?

Expected answer / marking points: “Ability beyond disability.”

Q7 [1]

Question: Write the formula for kinetic energy.

Expected answer / marking points: $\frac{1}{2}mv^2$.
