PARENT ONLY — SOLVED ANSWER KEY

Vyom · Parent answer key

23 Nov – 29 Nov 2026 · Monday–Sunday · NDPS Class 9

Vyom ko test se pehle ye PDF mat dena. Student pack mein sirf questions aur blank answer space hai. Is alag parent PDF mein har original question ke saath uska matching solved answer, working aur marking points diye hain; Test ID se student paper match karein.

Checking: same evening. C = concept, R = recall, K = careless, T = time.

90%+: short revision. 75–89%: weak-topic practice + retest. Below 75%: topic dobara samjhao; mistakes notebook mein likho.

Answer keys existing source question banks se li gayi hain; school pattern abhi unconfirmed hai. Alternate valid answers ko marking guidance ke mutabik accept karein.

Class 9 · Kaveri Units 1–5 · Grammar · Writing

Q1 **[4]**

Question: Read the passage and answer the questions.

> Every Saturday morning, a small blue van stops at the edge of Rampur village. Its sides open like a cupboard, and inside are shelves full of books — stories, comics, science magazines and books in Hindi, English and Marathi. This is the village's "library on wheels", started three years ago by a retired schoolteacher, Mrs. Kulkarni.
>
> At first, only a handful of children came. Many parents felt that reading storybooks was a waste of time when there was farm work to be done. Mrs. Kulkarni did not argue. Instead, she began reading aloud under the neem tree. Soon, mothers and grandparents stopped to listen too. Within a year, more than eighty people had library cards, and the oldest member was a seventy-year-old farmer who had just learnt to read.
>
> Teachers in the village school say that children who borrow books regularly now write better and ask more questions in class. Mrs. Kulkarni smiles when she hears this. "Books do not ask whether you are rich or poor, young or old," she says. "They only ask you to open them."

(i) The "library on wheels" was started by: (a) the village school (b) a retired teacher (c) the panchayat (d) a farmer
(ii) Why did many parents not send their children at first? (a) The van came too early (b) Books were expensive (c) They felt reading storybooks wasted time needed for farm work (d) The books were only in English
(iii) The word "handful" in paragraph 2 means: (a) a small number (b) a full hand (c) a large crowd (d) a few books
(iv) Which of these is an **opinion**, not a fact? (a) The van stops every Saturday. (b) More than eighty people had library cards. (c) Reading storybooks is a waste of time. (d) The oldest member was seventy.

Expected answer / marking points: (i) (b) (ii) (c) (iii) (a) (iv) (c) [1 × 4]

Q2 **[2]**

Question: How did Mrs. Kulkarni change people's minds without arguing with them? (30–40 words)

Expected answer / marking points: She began reading stories aloud under the neem tree; children, mothers and grandparents stopped to listen and became interested on their own [2].

Q3 **[2]**

Question: What does Mrs. Kulkarni mean when she says, "Books … only ask you to open them"?

Expected answer / marking points: Books are open to everyone — rich or poor, young or old; the only thing needed is the willingness to read [2].

Q4 **[4]** **Question:** Fill in the blanks with the correct form of the verb in brackets:
(i) Sentila _____ (watch) her mother make pots every evening last year.
(ii) By the time Ravi reached the park, Grandpa _____ (already / buy) a cone of peanuts.
(iii) Look! The children _____ (play) under the neem tree.
(iv) Avva _____ (learn) the Kannada alphabet before Dussehra next year.

Expected answer / marking points: (i) watched (ii) had already bought (iii) are playing (iv) will have learnt [1 × 4]

Q5 **[2]** **Question:** Change into reported speech: (i) Grandpa said to Ravi, "I am going out to buy a Tamil newspaper." (ii) The teacher asked the students, "Have you finished the chapter?"

Expected answer / marking points: (i) Grandpa told Ravi that he was going out to buy a Tamil newspaper. [1] (ii) The teacher asked the students if/whether they had finished the chapter. [1]

Q6 **[2]** **Question:** Fill in the blanks with suitable modals (could, must, should, might) — use each once:
(i) You _____ respect your elders.
(ii) Take an umbrella; it _____ rain this afternoon.
(iii) Deepa Malik _____ swim very well even before she became a para-athlete.
(iv) Students _____ wear a helmet while cycling to school.

Expected answer / marking points: (i) should (ii) might (iii) could (iv) must [½ each]. (Accept "must" in (i) and "should" in (iv) if both used once.)

Q7 **[5]** **Question:** Write a descriptive paragraph (100–120 words) on **"A Visit to a Village Craftsperson"** — describe the place, the person, the craft and how you felt.

ATHVA / OR

Write an email (100–120 words) to the Principal of your school requesting that a reading corner be set up in your classroom. Give reasons.

Expected answer / marking points: Content and description [2], organisation [1.5], language accuracy [1.5]. Email: format (to, subject, salutation, sign-off) [1] + content [2.5] + language [1.5].

Q8 **[3]** **Question:** Write a diary entry (60–80 words) about a day you spent with your grandparents.

Expected answer / marking points: Format (date, day, time, salutation "Dear Diary", signature) [1]; content and feelings [1]; language [1].

Q9 **[4]** **Question:** Choose the correct option:
(i) In "How I Taught My Grandmother to Read", the grandmother wanted to learn to read so that she could: (a) teach other women (b) read the story *Kashi Yatre* herself and not depend on others (c) write letters to her son (d) get a job
(ii) In "The Pot Maker", Arenla wanted Sentila to learn: (a) farming (b) weaving (c) cooking (d) painting
(iii) In "Vitamin-M", Grandpa disliked living in the city because of: (a) its noise and bustle (b) its cold weather (c) his grandson (d) the food
(iv) In "The World of Limitless Possibilities", Dr. Deepa Malik's breakthrough moment was: (a) a gold medal in swimming (b) a silver medal in shot-put at the 2016 Rio Paralympics (c) the Arjuna Award (d) a bronze in javelin

---

Expected answer / marking points: (i) (b) (ii) (b) (iii) (a) (iv) (b) [1 × 4]

Q10 **Question:** Why did the grandmother touch the narrator's feet? What does this tell us about her?
[2]

Expected answer / marking points: She touched her granddaughter's feet because she respected her as her teacher [1]; she believed a teacher deserves respect whatever the age — shows humility and gratitude [1].

Q11 **Question:** Give two reasons why Arenla did not want Sentila to become a potter.
[2]

Expected answer / marking points: Pot making is tiring and takes months of hard work; the earnings are only a few rupees; weaving pays more, takes less time and can be done indoors in all seasons (any two) [2].

Q12 **Question:** Why do you think Grandpa gave Ravi a detective story book as a gift?
[2]

Expected answer / marking points: Grandpa had noticed that Ravi was secretly following him all day like a detective [1]; the gift was his playful way of letting Ravi know he had been caught [1].

Q13 **Question:** In "Winds of Change", how did pankhas from different regions of India become different from one another?
[2]

Expected answer / marking points: Different villages and towns developed their own varieties using local materials (e.g., sola, bamboo, beads, leather) and distinct designs (mirror work, appliqué, gold thread) [2].

Q14 **Question:** "There is no age limit for learning." Explain this statement with reference to the grandmother in "How I Taught My Grandmother to Read". (80–100 words)
[4]

ATHVA / OR

"I had two choices — squander my life in remorse or transform it." How does Dr. Deepa Malik's story show courage and a positive attitude? (80–100 words)

Expected answer / marking points: Grandmother decided to learn at an old age after feeling helpless when she could not read Kashi Yatre; she practised daily and learnt the alphabet; she proved that determination matters more than age; her respect for her teacher; message for readers (content 3 + expression 1).
OR: Diagnosed with a spinal tumour and paralysed, she chose not to give up; used her love for sports and swimming; switched to para-athletics; won silver at Rio 2016; changed perceptions about disability (content 3 + expression 1).

Q1 [1] **Question:** What is the momentum of a 2 kg ball moving at 5 m s^{-1}?

Expected answer / marking points: 10 kg m s^{-1}.

Q2 [2] **Question:** A force of 20 N acts on a 4 kg body at rest. Find its acceleration and velocity after 3 s.

Expected answer / marking points: a = F/m = 5 m s^{-2} [1]; v = 15 m s^{-1} [1].

Q3 [1] **Question:** What is the probability of a sure (certain) event?

Expected answer / marking points: 1.

Q4 [1] **Question:** A coin is tossed 50 times and gives 28 heads. Find the experimental probability of a head.

Expected answer / marking points: 28/50 = 0.56.

Q5 [1] **Question:** Find the mean of 2, 4, 6, 8, 10.

Expected answer / marking points: 6.

Q6 [1] **Question:** Find the mode of 3, 5, 3, 7, 3, 9.

Expected answer / marking points: 3.

Q7 [1] **Question:** Find the median of 7, 1, 5, 3, 9.

Expected answer / marking points: Sorted 1, 3, 5, 7, 9 ⇒ 5.

Q8 [2] **Question:** Find two solutions of 4x + 3y = 12 and the points where its graph meets the axes.

Expected answer / marking points: Meets x-axis at (3, 0) and y-axis at (0, 4) [1]; these (or e.g., (6, –4)) are solutions [1].

Maths · Practice Test (Pre-annual practice) · Answer key

Wednesday, 25 November 2026 · 40 marks

Test ID: T2026-11-25

Class 9 · Mixed: Ch 3, 4, 5, 6, 7, 8, 9, 10, 11, 12

Q1 **[1]**

Question: The probability of an impossible event is:

(a) 1 (b) 0

(c) 1/2 (d) –1

Expected answer / marking points: (b) 0

Q2 **[1]**

Question: Two coins are tossed together. The probability of getting at least one head is:

(a) 1/4 (b) 1/2

(c) 3/4 (d) 1

Expected answer / marking points: (c) 3/4 — outcomes HH, HT, TH, TT; 3 favourable.

Q3 **[1]**

Question: The common difference of the AP 3, 7, 11, 15, ... is:

(a) 3 (b) 4

(c) 7 (d) –4

Expected answer / marking points: (b) 4

Q4 **[1]**

Question: gcd(375, 825) =

(a) 25 (b) 75

(c) 125 (d) 15

Expected answer / marking points: (b) 75 ($375 = 3 \times 5^3$, $825 = 3 \times 5^2 \times 11$)

Q5 **[1]**

Question: The converse of "If a number is a multiple of 6, then it is a multiple of 3" is:

(a) If a number is not a multiple of 6, it is not a multiple of 3.

(b) If a number is a multiple of 3, then it is a multiple of 6.

(c) If a number is a multiple of 3, then it is not a multiple of 6.

(d) A number is a multiple of 6 only if it is odd.

Expected answer / marking points: (b)

Q6 **[1]**

Question: The area of a triangle with sides 7 cm, 24 cm and 25 cm is:

(a) 168 cm^2 (b) 84 cm^2

(c) 87.5 cm^2 (d) 56 cm^2

Expected answer / marking points: (b) 84 cm^2 — $7^2 + 24^2 = 25^2$, right triangle, ½ × 7 × 24.

Q7 **[1]**

Question: In every parallelogram, the diagonals:

(a) are equal (b) are perpendicular

(c) bisect each other (d) bisect the angles

Expected answer / marking points: (c) bisect each other

Q8 **[1]** **Question:** A T20 team scores 6 runs in the first over and 12 runs in the second over. Their run rate after 2 overs is:

(a) 6 (b) 9

(c) 12 (d) 18

Expected answer / marking points: (b) 18 runs / 2 overs = 9

Q9 **[1]** **Question:** Which of the following is irrational?

(a) 0.25 (b) 22/7

(c) $\sqrt{5}$ (d) 0.3333...

Expected answer / marking points: (c) $\sqrt{5}$

Q10 **[1]** **Question: A:** "If the road is wet, then it has rained" is the converse of "If it rains, then the road is wet".
R: The converse of a true proposition is always true.

(a) Both A and R are true, and R is the correct explanation of A.

(b) Both A and R are true, but R is not the correct explanation of A.

(c) A is true, but R is false.

(d) A is false, but R is true.

Expected answer / marking points: (c) A true; R false (converse need not be true — road can be wet for other reasons).

Q11 **[1]** **Question: A:** 3, 6, 12, 24, ... is a geometric progression.
R: In a GP, each term after the first is obtained by multiplying the previous term by a fixed non-zero number.

(a) Both A and R are true, and R is the correct explanation of A.

(b) Both A and R are true, but R is not the correct explanation of A.

(c) A is true, but R is false.

(d) A is false, but R is true.

Expected answer / marking points: (a)

Q12 **[2]** **Question:** The wheel of a bicycle has a diameter of 70 cm. How far will the cyclist travel when the wheel rotates 100 times?

Expected answer / marking points: Circumference = $\pi d = 22/7 \times 70 = 220$ cm [1]; distance = $100 \times 220 = 22{,}000$ cm = 220 m [1].

Q13 **[2]** **Question:** A bag contains 3 red, 2 blue and 1 green ball. One ball is picked at random. Find the probability that it is **not** red.

Expected answer / marking points: Not red = 3 of 6 balls [1]; P = 3/6 = 1/2 [1].

Q14 **[2]** **Question:** Find the 31st term of an AP whose 11th term is 38 and 16th term is 73.

Expected answer / marking points: $a + 10d = 38$, $a + 15d = 73 \Rightarrow 5d = 35$, $d = 7$, $a = -32$ [1]; $a_{31} = -32 + 30 \times 7 = 178$ [1].

Q15 [2] **Question:** Give a counterexample to show that the proposition "If n is a prime number, then n is odd" is false. Write the converse of this proposition.

Expected answer / marking points: Counterexample: n = 2 is prime but even [1]. Converse: If n is odd, then n is a prime number (also false, e.g., 9) [1].

Q16 [3] **Question:** Shreyas holds 25 shares at an average price of ₹150 and buys 10 more at ₹30 each. (i) Find his new average price per share. (ii) Vaishnavi holds 5 shares at an average price of ₹150. She buys some shares at ₹30 each and her average becomes ₹70. How many shares did she buy?

Expected answer / marking points: (i) Total cost = 25 × 150 + 10 × 30 = 3750 + 300 = ₹4050; average = 4050 ÷ 35 ≈ ₹115.71 [1.5].
(ii) $(750 + 30x)/(5 + x) = 70 \Rightarrow 750 + 30x = 350 + 70x \Rightarrow 40x = 400 \Rightarrow x = 10$ shares [1.5].

Q17 [3] **Question:** An isosceles triangle has perimeter 40 cm and each equal side is 15 cm. Find its area.

Expected answer / marking points: Base = 40 − 30 = 10 cm [0.5]. Height = $\sqrt{(15^2 - 5^2)} = \sqrt{200} = 10\sqrt{2}$ cm [1]. Area = ½ × 10 × $10\sqrt{2} = 50\sqrt{2} \approx 70.7$ cm^2 [1.5]. (Heron: s = 20, $\sqrt{(20 \times 5 \times 5 \times 10)} = \sqrt{5000} = 50\sqrt{2}$ — also correct.)

Q18 [3] **Question:** How many three-digit numbers are divisible by 7?

Expected answer / marking points: Smallest = 105, largest = 994 [1]; AP with d = 7: 994 = 105 + (n − 1)7 [1] ⇒ n − 1 = 127 ⇒ n = 128 [1].

Q19 [3] **Question:** ABCD is a parallelogram. P and Q are points on diagonal BD such that DP = BQ. Prove that APCQ is a parallelogram.

Expected answer / marking points: Let diagonals AC and BD meet at O. In a parallelogram, OA = OC and OB = OD [1]. OP = OD − DP and OQ = OB − BQ; since OD = OB and DP = BQ, OP = OQ [1]. So the diagonals AC and PQ of APCQ bisect each other at O, hence APCQ is a parallelogram [1].

Q20 [4] **Question:**

> In a lab, the number of bacteria in a culture doubles every hour. At the start there are 30 bacteria.

(i) How many bacteria will there be at the end of the 2nd hour? [1]
(ii) At the end of the 4th hour? [1]
(iii) Write a formula for the number at the end of the n-th hour, and find the first hour at the end of which the number exceeds 1000. [2]

Expected answer / marking points: (i) 30 × 2^2 = 120 [1] (ii) 30 × 2^4 = 480 [1] (iii) N = 30 × 2^n [1]; 30 × 2^5 = 960, 30 × 2^6 = 1920, so end of the 6th hour [1].

Q21 [5] **Question:** A basket contains 4 red balls and 5 blue balls. One ball is drawn and kept aside, then a second ball is drawn. Draw a tree diagram and find the probability that (i) both balls are red (ii) both are blue (iii) one is red and one is blue.

ATHVA / OR

State and prove the Midpoint Theorem: the line segment joining the midpoints of two sides of a triangle is parallel to the third side and equal to half of it.

Expected answer / marking points: Correct tree with branch probabilities 4/9, 5/9 and then 3/8, 5/8 / 4/8, 4/8 [2]. (i) 4/9 × 3/8 = 1/6 [1] (ii) 5/9 × 4/8 = 5/18 [1] (iii) 4/9 × 5/8 + 5/9 × 4/8 = 40/72 = 5/9 [1]. Check: 1/6 + 5/18 + 5/9 = 1.
OR: Statement + figure (△ABC, D, E midpoints of AB, AC) [1]. Extend DE to F with EF = DE, join CF; △ADE ≅ △CFE (SAS) [1.5] ⇒ CF = AD = DB and CF ∥ AB, so DBCF is a parallelogram [1.5] ⇒ DE ∥ BC and DE = ½DF = ½BC [1].

---

Q1 [1]

Question: 'भारति जय विजय करें' के कवि कौन हैं?

Expected answer / marking points: सूर्यकांत त्रिपाठी 'निराला'।

Q2 [1]

Question: इस कविता में किसकी वंदना की गई है?

Expected answer / marking points: भारत माता की।

Q3 [2]

Question: Write the sample space when a coin is tossed and a die is thrown together. How many outcomes are there?

Expected answer / marking points: H1, H2, ..., H6, T1, ..., T6 [1]; 12 outcomes [1].

Q4 [2]

Question: A letter is chosen at random from the word MATHEMATICS. Find P(M) and P(vowel).

Expected answer / marking points: 11 letters; M appears 2 times ⇒ 2/11 [1]; vowels A, E, A, I ⇒ 4/11 [1].

Q5 [1]

Question: Can sound travel through vacuum?

Expected answer / marking points: No — it needs a medium.

Q6 [2]

Question: Without drawing, state whether x – 3y = 4 and 2x – 6y = 9 intersect, coincide or are parallel.

Expected answer / marking points: $a_1/a_2 = b_1/b_2 = 1/2$ but $c_1/c_2 = 4/9$ [1] ⇒ parallel, no solution [1].

Q7 [1]

Question: What is a biome?

Expected answer / marking points: A large area with a typical climate, vegetation and animal life.
